

# RUBBER FLOORING SOLUTIONS FOR YOUR SPORTS FACILITIES

**nora**<sup>®</sup>  
by **Interface**<sup>®</sup>

# Versatile like decathletes and lasting like marathon runners

The world of sports has many facets, it is complex and versatile. And because even the most successful high-flying athletes need to be on firm ground once in a while, nora® has the perfect solution for sports applications.

Be it floor coverings which protect the joints, which ensure top performance for athletes, which convince through their anti-slip and walking safety characteristics and also offer fatigue-free walking. Or floor coverings which cope with the highest traffic load. Which are not damaged neither by spikes nor by skate runners and which cushion bullets from guns and pistols.

Versatile like decathletes and lasting like marathon runners, permanently resilient and always in great shape - nora® floor coverings made of rubber are absolutely predestined for use in the extremely demanding segment of special sports floor coverings and adjacent areas. And this has been proven in various soccer World Cup stadiums or Olympic arenas. With more than 300 colours and styles available, we merge function and aesthetic appeal to meet the unique demands of your sports facility.

# Exploit the benefits of rubber for the use in your sports facility

- Outstandingly wear-resistant and durable
- Free of PVC, phthalate plasticizers and halogenes
- Excellent anti-slip and cushioning properties
- Easy to clean and maintain
- No need to coat / seal resulting in significant savings
- Resistant to scuffing from shoes and wheels
- Fewer friction burns / injuries caused by falling
- Resistant to cigarette burns - no surface damage
- Also suitable for roller sports, safer skating courses and speed skating - after consultation with nora systems
- Outstanding fire-protection properties: highly flame-retardant as defined in EN 13501-1. They are classified as fire-toxicologically safe according to the German standard DIN 53 436, meaning they only have a minimal toxicity to combustion gases
- Carbon neutral flooring
- Customized logos or any other shape - perfect dimensional stability, no joint sealing necessary

# Rubber floor coverings handle the toughest activities

## Stadiums and multi-purpose arenas

nora® rubber floor coverings are used world-wide in traffic and adjacent areas of large sports stadiums and arenas. These areas are subject to high traffic load. In this respect, the resistance to wear, the long lifetime, and the easy cleaning of noraplan® and norament® floor coverings pay off. Even after years of intensive use, almost no wear marks are visible. Our norament® floor coverings are particularly suitable for very heavy traffic surfaces in stadiums.

## Entrance areas

Sports facilities and fitness centers operate in a competitive environment where it's important to make a strong impression. Plus, it's crucial to avoid slippage in entryways that get wet from rain or snow. Durable, easy to clean and slip-resistant, nora® floor coverings are available in many different designs and with custom-made inlays to turn in an impressive performance.

## Horseracing and stable areas

Thanks to its cut and gouge resistant surface nora® floorings are ideal for horse stables and any other horseracing areas. The high wear resistance protects the horseshoes and the resilient product contributes to a noise reduction within the stables.

## Inlays

With an ultrasonic cutting technology a precise manufacturing of customized logos or any other shape can be achieved - perfect dimensional stability, no joint sealing necessary.

## Ice rinks

The high rubber content in nora® floor coverings make it the ideal cut-resistant and slip-resistant surface for ice skate blades when skaters are walking or standing around the rink. Especially in these areas impact resistance and point resilience are required.

## Corridors and staircases

Corridors and staircases are often used as escape routes and therefore have to feature special fire-safety properties. In addition, these areas are usually highly frequented; therefore have to be extraordinarily wear-resistant and feature very good cleaning behaviour.

## Changing rooms

Safety is a priority in changing rooms and shower drying areas where water droplets and puddles can create slippery conditions. That's why floor coverings are to be used with slip resistance classification R10 or R11 and A & B.

## Cafeterias

Cafeterias are meeting places where the focus is on a pleasant atmosphere; therefore there are special demands on design and colouring for the floor covering. In addition there are often smoking zones in these areas, which require cigarette-burn resistance.

# Sports halls and multipurpose halls

noraplan® sentica is tested in line with EN 14 904:2006-06 and fulfils all requirements for playing areas. nora® rubber flooring provides excellent anti-slip and cushioning properties. The risk of friction burns or skin damage due to falling is very low.

# Fitness studios

Modern fitness studios are a combination of sports facility, leisure centre and spa. Therefore, the floor coverings must be both extremely durable yet also contribute to creating an inviting ambiance.

We particularly recommend our floor coverings norament® 926, norament® 926 grano, norament® 926 satura and norament® 926 arago for areas in which fitness equipment is set up. These floor coverings provide the widest range of designs and colours combined with great underfoot comfort and high durability.

For particularly joint-friendly exercise and sporting activities, such as gymnastics or aerobics, we recommend using acoustic flooring (noraplan® stone acoustic, noraplan® sentica acoustic or noraplan® signa acoustic) with a special shock-absorbing and footfall-absorbing underlay (20-dB footfall sound absorption improvement).

# norament<sup>®</sup> 992/992 grano

For areas with extreme requirements (e.g. ice rinks, golf clubs, animal stables, etc.).

## norament<sup>®</sup> 992

Round pastille

### norament<sup>®</sup> 992

Art. 992/1956

□ ~1002 mm x 1002 mm

nora<sup>®</sup> profile connection dimension: N

Please note price group black/coloured

## norament<sup>®</sup> 992 grano

Hammerblow surface

### norament<sup>®</sup> 992 grano

Art. 992 grano/1955

□ ~1002 mm x 1002 mm

nora<sup>®</sup> profile connection dimension: N

# norament<sup>®</sup> 945 grano

Rubber flooring with high percentage of recycled materials. norament<sup>®</sup> 945 grano for protection and safety in indoor shooting facilities.

## norament<sup>®</sup> 945 grano

Hammerblow surface

### norament<sup>®</sup> 945\* grano

Art. 945 grano/1938

□ ~1002 mm x 1002 mm

nora<sup>®</sup> profile connection dimension: U

\*This material is not part of the standard product range. Please contact your responsible nora representative office for further information.

Safety in indoor shooting ranges knows no compromises. norament<sup>®</sup> 945 grano meets this demand in several aspects:

- passed the bombardement test for rebound and ricochet behavior
- meets the requirements for classification in class B<sub>fl</sub>-s1 according to EN 13501-1
- offers the shooter a stable and safe foothold
- distinguishes itself by its wear resistance and long lifetime

## norament<sup>®</sup> stairtreads

Pre-shaped stair coverings consisting of stair nosing, riser and tread all in one piece for straight steps with right-angled edge. For extremely heavy traffic stairwell areas.

### Stairtread norament<sup>®</sup> 926

One-coloured with classic round pastille, footfall sound absorption improvement of 12 dB.

### Stairtread norament<sup>®</sup> 926 grano

Granular design rich in contrast with a hammerblow surface, footfall sound absorption improvement of 12 dB.

### Stairtread norament<sup>®</sup> 926 satura

Tone-in-tone granular design with a hammerblow surface, footfall sound absorption improvement of 12 dB.

### norament<sup>®</sup> stairtreads with signal or safety stripes

norament<sup>®</sup> stairtreads can be equipped with signal or safety stripes.

### nora<sup>®</sup> stair nosings

With plug-in lip for quick and easy installation on all types of staircases.

## nora<sup>®</sup> accessories for stairwell areas

Accessory range made of rubber matched to suit norament<sup>®</sup> and noraplan<sup>®</sup> floor coverings. Can also be used in combination with other types of floorings. nora<sup>®</sup> profiles are impact and shock-resistant, do not shrink, do not contain any plasticizers and retain their functional reliability long term.
